

Dime

With the new Dime luminaire Regent is writing lighting history. Thanks to the specially developed "Square Optics", collimating optics for square light distribution, Regent has come up with a solution that succeeds in combining planar lighting and clearly focussed light from one light source. The result: the perfect illu-

mination of vertical surfaces without multiple shadows – the unique ambience designers strive to achieve. A great step towards efficient, purposefully designed lighting, Dime is the first luminaire from Regent to exploit the technical potential of the LED to the full.
